how did judy garland die

Published: September 3, 2026 | Index ID: #-

- Judy Garland died on June 22, 1969, at the age of 47.
- The official cause of death was an accidental overdose of barbiturates (Seconal).
- Her passing occurred in her rented mews house in Chelsea, London.
- The death was ruled an "incautious self-overdosage," not a deliberate suicide.
- Her death is deeply linked to the systemic pressures and substance administration common in the Golden Age of Hollywood.
